APPROVAL.....OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 56407 is issued subject to the terms and conditions imposed in said Permit 56407 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the Proof of Completion of Work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.  
(CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed.....4.3.....cubic feet per second, but not to exceed 1502.1  
acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before.....  
Proof of completion of work shall be filed before.....  
Application of water to beneficial use shall be made on or before.....  
Proof of the application of water to beneficial use shall be filed on or before.....  
Map in support of proof of beneficial use shall be filed on or before.....

EXPIRED  
DATE MAY 31 1993

## (PERMIT TERMS CONTINUED)

The total combined diversion rate of Permits 54247, 54759, 54760, 54761, 54762, 54763, 54764, 56367-T, 56406, 56407, 57676-T and 57695-T shall not exceed 10,000 gallons per minute or 22.28 cubic feet per second and the total volume of water diverted for dewatering, mining or other industrial uses shall not exceed 16,130 acre feet per annum. All water diverted that cannot be placed to a beneficial use shall be injected back to the Pumpernickel Valley and/or Clovers Area groundwater system. The existing surface discharge to the Herrin Slough may continue until November 1, 1992, subject to the permitting requirements of other state, federal and local agencies. Injection of excess water, or substitution for other permitted industrial or mining uses, shall be the only means of disposal after that date. This permit does not relieve the operator of the requirements of other state, federal or local agencies.

All water diverted, used in the mining and milling process and discharged to the slough shall be measured continuously and reported on a monthly basis.

A measuring device approved by the State Engineer as to the type and location, shall be installed at the downstream end of the slough just prior to any of the discharged water entering the Humboldt River. This measurement device shall be installed within 30 days from the issuance of this permit. The measurements shall be on a continuous basis and reduced to daily flows.

The monitoring plan revised November 22, 1991, is hereby adopted with one exception, that being the frequency of water level measurements shall be made and reported on a monthly basis for a period of one year after the issuance of this permit. The monitoring plan will be reviewed at the end of this one year period, to determine if any other modifications are necessary.

All data from the water diverted and used, the measurement of water in the slough and the water level measurements shall be submitted to the State Engineer within 15 days of the last day of the preceding month.

The total combined duty of water under Permits 54247, 54759, 54760, 54761, 54762, 54763, 54764, 56367-T, 56406, 56407, 57676-T and 57695-T shall not exceed 3,144 acre-feet annually.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on May 31, 1993 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
